a. Update on CLG – Carriage House Study.

Mr. Henninger stated that he will set up a time for the sub-committee and Mae Williams to go over the drop box folder.

b. Report by Member Richards in regards to NH Division of Historical Resources study of demolition review.

Mr. Richards has been researching demolition review ordinances and how to enhance revenue by collecting fees. He conducted a study done of different demo reviews country wide. Mr. Richards has information that he will e-mail to Commission Members. He stated that his research found that the level of administrative procedures for fee exaction was not included in any material available. Mr. Richards noted that there is a great similarity of demo reviews when comparing Concord's to other communities. What does differ is the historic time factor; some communities use 75 or 30 years while Concord uses 50 years. Other communities also have slightly larger square footage requirement; Concord's is 500. Since Mr. Richards could not find the information sought, he is willing to make some phone calls to other communities that administer the fees to inquire about protocol.

Chair Donovan gave an overview of the Demolition Review stating that most demolitions are documented by a few photos only and that there is no repository to store those in. Discussion ensued about the demolition process and how to document the projects. Ms. Larson will speak to Craig Walker, Code Administrator, to find out how cumbersome or reasonable a fee structure implementation and collection of studies would be.

c. Sewalls Falls Bridge reconstruction - project mitigation

Mr. Henninger distributed a draft proposal to be submitted to Ed Roberge, City Engineer, for the City Council's consideration. The proposal consists of report and research, historic monuments, and web page publishing components. The Commission stated the proposal looked good and discussed the benefits of having a web page dedicated to Historical Concord.
